Hiring Manager
Dalol Tech
Addis Ababa, Ethiopia

Subject: Application for Software Engineering Internship

Dear Hiring Manager,

I am writing to apply for the Software Engineering Internship at Dalol Tech. I am a Software Engineering student at Injibara University, and I am eager to strengthen my practical skills, learn from experienced developers, and contribute to meaningful software projects in a professional team.

Through my coursework and academic and personal projects, I have been developing my understanding of web application development, software design, database management, and version control. My project work has included systems such as a Human Resource Management System, a Student Registration System, and an Employee Management System. These projects have helped me practice translating requirements into application features, organizing software components, and working through implementation challenges.

I am motivated to keep learning, accept feedback, and improve the quality of my work. I would welcome the opportunity to support Dalol Tech's development team while gaining experience with professional development practices and real-world project workflows. I would bring curiosity, commitment, and a willingness to learn, while continuing to build on the knowledge I have gained as a student.

Thank you for considering my application. I would appreciate the opportunity to discuss my interest in the internship and how my academic background and project experience may fit your team's needs.

Sincerely,

Chalie Melkamu Wagnew
Software Engineering Student
Injibara University
